

## Barn Owner Responsibilities at Release

1. Clean up any rat poisons that might be in the barn or the immediate area.
2. Purchase a medium or large size feeder and waterer (PetsMart, Petco, WalMart, feed store, etc).
3. Set up a feeding station so the cats know exactly where to find food and water. Take into consideration ants (**Food Grade** (not pool grade) Diatomaceous Earth can be purchased at feed stores) and dogs/raccoons (put the feeding station in a secure location).
4. You can also put in a "hiding box" (dog house, large box, etc.) for them or secure a "high place" on top of a stall or high beam.
